

Access and Analyze Your Data Quickly and Easily

Get direct SQL access to your critical business data

- Retrieve replicated business data from a live transactional database
- View at-a-glance dashboards
- Build custom reports
- Extract, transform and load detailed business data
- Integrate with other systems for expanded analyses
- Conduct intensive data processing

NAVITAIRE DATA STORE

Navitaire Data Store products replicate business data from your live, transactional database, giving you full access to all reservation data, including bookings, passengers, trip details, fees, payments and agency transactions quickly and easily.

Three Ways to Meet Your Needs

We know every customer's needs are different. That's why we offer three ways to help you convert your data into actionable insights. With Data Store you can extract, transform and load reservations data into your strategic operational systems with ease.

- **Data Store** – Get near real-time access to your data to create custom reports – or use any of over 100 standard reports.
- **Data Store Workbench** – Gain all the functionality of Data Store, plus the ability to create data extractions to use in other systems.
- **Enhanced Data Store** – Add the ability to perform intensive data processing without impacting your reservations system's performance and integrate data from other sources.
