

Simplify Interline Passenger Settlements

NAVITAIRE INTERLINE ASSIST

Whether you're new to interline billing or want to enhance your functionality, Navitaire Interline AsSISSt can help streamline your settlement processes.

Interline sales can help expand revenue opportunities, but settling between partners can be challenging. Airlines need an interline passenger settlement solution that's intuitive, automates critical – but time-consuming – tasks and integrates with their revenue accounting system.

Your Complete Solution for Receivables and Payables

With Navitaire Interline AsSISSt, you'll get 100% electronic interline passenger settlement functionality, plus access to rich data and sophisticated analytics and query tools. Built to integrate with third-party revenue accounting systems, its powerful analytics capabilities use business intelligence to help identify pricing discrepancies and stem revenue loss from avoidable billing errors.
