NAVITAIRE & TRIPSTACK

## TripStack and Navitaire team up to provide virtual interlining capabilities

Virtual Interlining lets airlines expand their existing network to help generate additional revenue without the cost and complexity associated with traditional interline agreements. Navitaire's partnership with TripStack offers Navitaire-hosted airlines another novel way to reach more customers using modern technology to streamline the Virtual Interline (VI) booking process.

Virtual Interlining (also known as self-connect) lets travelers combine flights from multiple carriers into a single itinerary. It offers more choices for travelers and new ways for airlines to support their distribution and growth strategies.

The TripStack partnership makes innovative VI technology available to Navitaire hosted carriers:

- Freedom to choose partners, routes, connections and configure user experience
- Access to Low-Cost-Carriers (LCC), NDC API connections and VI fares
- Ability to sell additional non-airline ancillaries such as travel insurance, lost baggage protection and flexible ticket options
- Redirect to branded airline white label website with fully supported technology, payment and customer service, maintained by TripStack
- Support for missed connections and schedule changes, including allowances for meals and lodging, via the TripStack Self Connect Guarantee
- Optional fare caching to help reduce look-to-book ratios
